

Compost Culture's

# *Curbside Organic Waste Pickup Service*

## **How it works:**

Once you sign up, we start by personally delivering a bin, compostable bags, and informational material.

**You** collect all of the organic waste that your household produces during the week

**You** will be given a once-a-week pickup day. Every Sunday morning at 8 am, leave your filled bin in front of your house for pickup.

**We** (one of our drivers) will come by and pick up the bin from outside of your house and empty its contents into our own larger vesicles.

**Your** bin will be returned to the front of your house where it can be cleaned and then refilled with organic waste until next week's pickup.

**We** bring the waste it to a local organic garden to be composted!
